### ▶ TECHNOLOGY OVERVIEW

The present invention discloses a marine water energized system for treating marine water and producing energized marine water for aquaculture of marine living organisms. The marine water energized system is constructed with several supportive devices and all the supportive devices are connected with a water piping system. The supportive devices are selected from the group of: a sediment well; a sludge remover with an air blower; a sludge tank; a mechanical filter; 3 filtering supportive devices; a venture skimmer; an ultraviolet sterilizer; and a captivity tank which equipped with the aerator and oxygen trapper.
